

Food Safety and Standards Authority of India

Vision of the Authority

A food safety system of India which ensures full participation of the producers, processors, consumers, governments and other stakeholders in the process of building and maintaining the confidence that the food they produce, consume and export is safe, wholesome and adhering to the highest international standards.

Mission of the Authority

Authority will build and implement an effective food regulatory and monitoring system for continued food safety and standard and provide science-based information to the consumer to make choices relating to food and to lead a healthy and productive life.
