

Recognizing the Importance of Plastic Waste Management,

Tata Chemicals Ltd

commit to

Effectively manage Plastic waste and Reduce our Plastic footprint
towards achieving a Plastic-Waste free Food & Beverages sector.

In order to effectively Manage Plastic Waste, we are currently practicing:

1. Engaged Producer Responsibility Organizations (“PRO”) in multiple States to collect post-consumer waste. Collected 75% waste during Financial Year 2018-19 and continue to collect in the Financial Year 2019-20;
2. Engaged an approved agency for collection of pre consumer waste from our packing centres across India and transport the same for recycling, upcycling or reuse;
3. Reuse of HDPE Bags;
4. Developed recyclable packs for packaging of “Tata Salt” and placed in specific markets.

We further commit to monitor the Reduction of Plastic footprint of our Food Products by tracking the following information:

1. Scale up of use of recyclable pack for “TATA Salt” on Pan India basis;
2. Through PRO partnerships, organise awareness and training programmes on “How To Handle Plastic Waste” to various stake holders including school children, community etc.;
3. Evaluating optimisation of packaging without compromising on the product quality and safety.
